no

It is by far not a 5EC course (even if you read all the articles provided)

Those 5 EC feel not like they would be earned rightfully. I guess most of the MC questions are manageable without reading any paper in advance. The effort to write two peer-reviews and commentaries does not account for that many EC.

Pagina 12 van 20 Rapportdatum : 16-08-17

I think this is the right place. After almost two years studying AI it is important to think about some philosiphical issues.

Could also be in the first year of the program.

Spot on.

Pagina 13 van 20 Rapportdatum : 16-08-17

It was very very interesting, althought some of them more understandable than others

nn

You don't need to read it all to pass the course, however, it is interesting

The literature was interesting and useful to get a good understanding of the topics.

Literature load was good for those that worked their way through it. I can imagine that many did not do that because the incentives and the pressure are very light.

I liked most of the literature, although some articles were not scientific enough. But I understand why we read the literature. One suggestion: Maybe add additional literature recommendation either in the course guide or in the end of the corresp. slides.

Very interesting topics, fun and stimulating/motivating reads.

Pagina 14 van 20 Rapportdatum : 16-08-17

nΛ

I think, the learning objectives could be better met if one is forced to write more. Therefore go through more training and improve one's skills.

Pagina 15 van 20 Rapportdatum : 16-08-17

nΛ

I appreciated that all the texts were available even before the course started! The lectures were all awesome.

Maybe opening a windows or letting the door open might be useful – especially in the summer.

Opmerkingen bij vraag: 24: E6. Do you have any furthe....

You are great. I will miss teachers like you

nο

Both teachers encouraged discussions and interaction during the lecture, which made the lectures more stimulating and interesting.

Always happy to enroll in courses with Pim and/or Giulio!

The teaching assistant for the workgroups swore a lot lot out loud, that was not really all too inspiring or professional.

Pagina 17 van 20 Rapportdatum : 16-08-17

They are great

nο

The working groups were kind of fun. A potential improvement might be to have a bit more structure to them. To not talk the whole time about e.g. definitions of intelligence without approaching other topics.

Pagina 18 van 20 Rapportdatum : 16-08-17

าด

More information on the commentary, because apparently, there were not a lot of students who actually wrote a good commentary. Tell students which aspects you expect

There is no exam, which is not a good thing

The commentaries took a lot of time before it was made available.

It was not clear to me, that the length of the texts is rather strict (often the number of words given is the lower bound). Would be good to know that before writing. I did like that we also had to write peer-reviews!

The MC-questions were a nice idea. Although I've read all the literature, I found the MC's to be only a small incentive. Reading the material takes some time and I think that most students skip it as far as possible.

Pagina 19 van 20 Rapportdatum : 16-08-17

าก

Very nice and good course! Always interesting to be present at lectures

The workgroup is better when there are conversations in smaller groups, I think. It gives space for more your own idea, then the idea of 20 people Introduce an exam (about the articles) to sort of 'force' students to read them and come to the lectures.

I would like to share that from what I have seen, I think that the multiple choice questions in the beginning of the lectures really help the attending rate of the lectures. Also, i think this course is very nice!

Make the course a bit harder. Find a way to make sure that students are forced to read the literature. Let us write more such that we can really improve our writing skills. In general: super interesting class!

Maybe ask harder and more MC's and let this part count substantially more like 30 % or 40 % of the final grade. That should be incentive enough to properly prepare for the lectures.

Very good course overall! Opens up a lot of new perspectives (not only about Al!)
